MEMORANDUM FOR MR. MORDON BRAY

SUBJECT: [REDACTED]

[REDACTED]

As reported in the New York Times this morning, Senator Jackson proposed on the Senate floor yesterday that the U.S. place its reconnaissance satellite at the service of the UN. His exact words were:

"... I have written to President Eisenhower, formally recommending that, subject to necessary safeguards, we offer to place our reconnaissance satellites at the service of the United Nations as a part of an international inspection program designed to prevent nuclear Pearl Harbors for any nation. If accepted, this offer would help to lay the groundwork for the beginnings of an enforceable disarmament program." (Cong. Rec., May 19, 1960, p. 9919)
